

MA81 430 13.5V FAN MOTOR

APPLICATION :

Engine Cooling in MUV

RATINGS :

Electrical :

System Voltage : 13.5 Volts

Polarity : Insul Return

Thermal

Operating Temp. Range : -20° C to +110° C

Weight : 1.7 Kg
(Approx.)

CHARACTERISTICS :

Voltage : 13.5 Volts

Rated Load : 7.2 Kgf. Cm

Speed : 3500 ± 150 RPM

Current : 32 Amps Max.

Rotation : Clock Wise (Viewed from Shaft End)

Features :

4 Pole PMDC Motor with RFI Filters

3 Piece Construction with wrapped Yoke

Ball Bearing at Drive End

Partially ventilated Motor

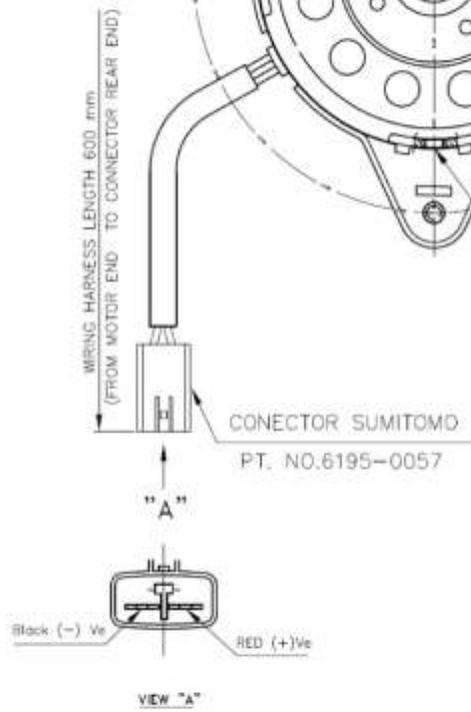

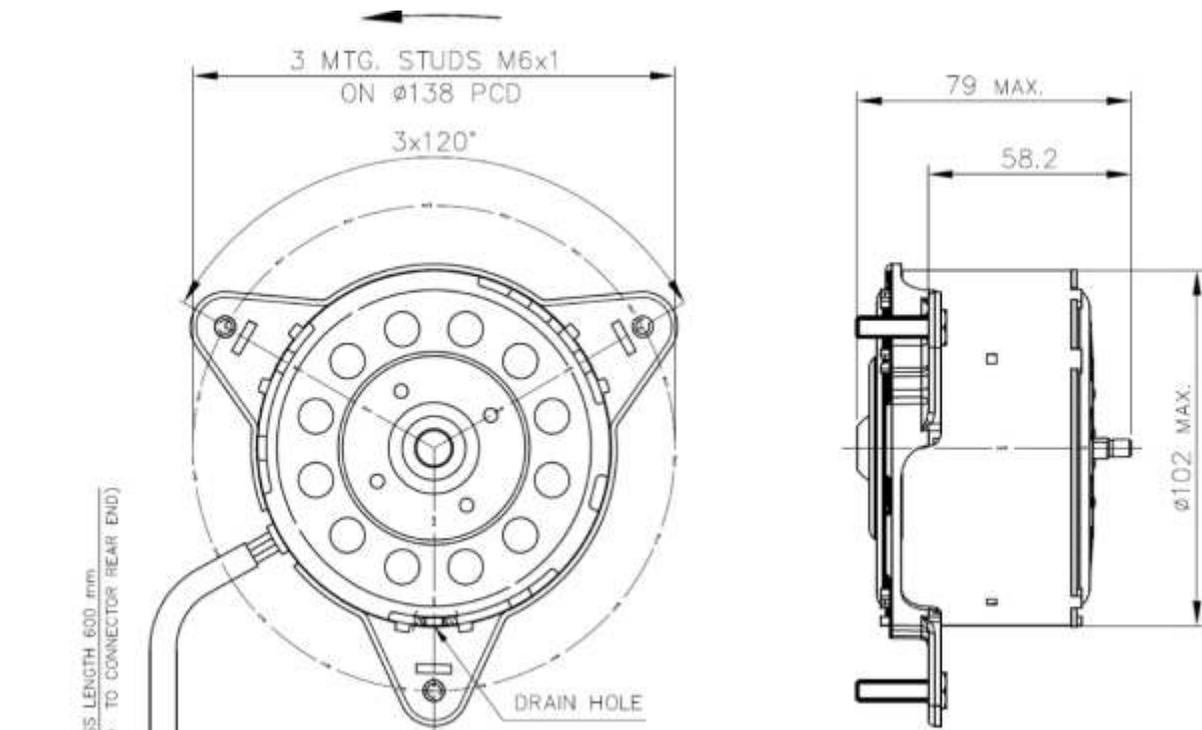

Shaft End profile to suit Fan Design

3 Point Stud Mounting

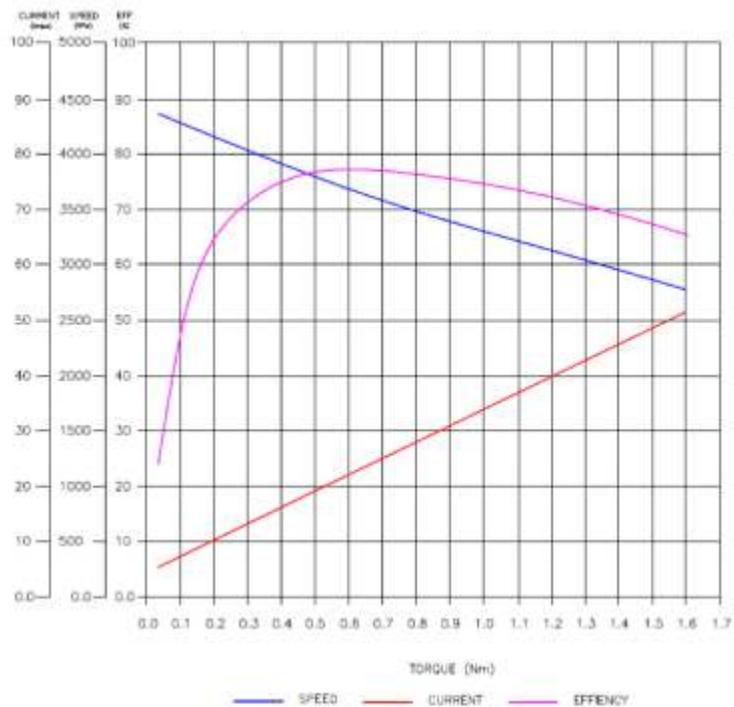

PRODUCT DATA SHEET

MA81 430 13.5V FAN MOTOR

All Dimensions are in mm

TYPICAL MOTOR PERFORMANCE CURVE AT 13.5 V

This product can only be used in approved applications and in accordance with maintenance requirements and replacement intervals. This information is available on request.
